KRAA Security focuses on your most relevant and important Information Security issues of the day. From Social Media Security Education, Technology, and Strategy services, to our Incident Management, Vulnerability Assessment, and Architecture solutions, our custom approaches enable you to maintain sound security practices in your organization.

Social Media Policy Development
We analyze how your company uses Social Media and develop policies to help ensure Social Media is used securely and in compliance with your company objectives.

Security and Regulatory Policy Development
We develop Information Security policies tailored specifically to your business that enable your organization to provide and maintain the correct policies to meet, exceed, and maintain regulatory compliance standards such as HIPAA, SOX, and PCI.

Security Architecture Strategy
We analyze your current Security Architecture Strategy and center our process on uncovering gaps in operating inefficiencies and areas of cost overrun. As we uncover areas of weak productivity or strategy misalignment with your business goals we provide you with custom tailored solutions.

Vulnerability Scanning & Penetration Testing
We regularly conduct Vulnerability Assessment Scanning and Penetration Testing exercises to validate your current external and internal security postures and produce Tactical and Strategic recommendations to help address any remediation actions necessary to correct any deficiencies.

Application Security Strategy
We review your current and future state Application Security requirements regardless of in-house or off the shelf developed applications and develop customized Security Strategies that take into account best practices in Application Security.

Website Security Assessment
We review your public facing web presence and assess vulnerabilities in the architecture, application, source code, and business processes around your websites and produce Tactical and Strategic recommendations for enhancement.

Social Media Security Training
We provide Social Media Security Training to educate employees on this rapidly evolving threat landscape. Delivered through our training portal, our Social Media courses are delivered interactively to your employees along with an employee acknowledgement to ensure compliance.

HIPAA Security Assessment
We provide security assessments against HIPAA requirements to determine gaps in in your physical and logical security to help you comply with the regulatory requirements.

Incident Response Management and Forensics
We analyze, investigate, and determine how attacks and compromises of your IT systems occur. We utilize a custom developed IMS portal solution to track and manage incidents in your organization.

Strategy Development
Tailored specifically to your environment, we take into account your business goals and objectives and discern how Information Technology best maps to your business objectives while developing a Strategic and Tactical roadmap of solutions that are customized to your organization.
